

PRANAV MASAL

Python Backend Developer | Django | FastAPI | REST APIs

Pune, Maharashtra, India | pranavmasal0273@gmail.com | 8446380273
github.com/Pranav-Masal | linkedin.com/in/pranav-masal/ | [Portfolio](#)

Professional Summary

Python Backend Developer focused on backend development, REST API development, database-driven applications, and AI-powered systems. Hands-on experience building applications using Python, Django, Django REST Framework, FastAPI, PostgreSQL, Docker, JavaScript, and AI APIs. Developed an AgriTech marketplace, help desk ticketing platform, and AI-powered document search application. Interested in scalable backend architecture, API development, automation, and practical AI integration.

Technical Skills

Languages: Python, SQL

Backend: Django, Django REST Framework, FastAPI, REST APIs, API Development, CRUD, Authentication, Authorization, JWT

Databases: PostgreSQL, MySQL

AI / LLM: LangChain, RAG

Tools & DevOps: Git, GitHub, Docker, Postman, CI/CD

Development Practices: Agile/Scrum, SDLC

Frontend: HTML, CSS, JavaScript, Bootstrap, Tailwind CSS

Projects

FarmerFirst – AgriTech Marketplace Platform

[GitHub](#) / [Live Demo](#)

Django | DRF | PostgreSQL | JavaScript | Docker

- Developed a role-based AgriTech marketplace using Django and Django REST Framework to connect farmers and buyers.
- Implemented JWT-based authentication and authorization, product management, cart, checkout, and order workflows.
- Built farmer-side order notifications to inform farmers when buyers place product orders.
- Designed and integrated REST APIs with PostgreSQL for persistent application data and marketplace operations.

HelpDeskPro – Help Desk Ticketing System

[GitHub](#) / [Live Demo](#)

Django | Django REST Framework | PostgreSQL | JavaScript | Chart.js

- Developed a role-based help desk ticketing system using Django and Django REST Framework for creating, assigning, tracking, and resolving support tickets.
- Implemented JWT authentication, role-based access control (RBAC), and REST APIs for Customers, Agents, and Administrators.
- Integrated PostgreSQL and Django ORM for managing users, tickets, categories, priorities, and support application data.
- Developed an Admin Dashboard with ticket statistics and category-wise problem analytics using Django ORM and Chart.js..

DocuSCAN – Document Search Project with RAG

[GitHub](#) / [Live Demo](#)

Python | FastAPI | RAG | Groq API | HTML/CSS/JavaScript

- Developed a document search application using Python and Retrieval-Augmented Generation (RAG) to retrieve relevant information from uploaded documents.
- Built REST APIs with FastAPI for document processing, search, and AI-powered question answering.
- Integrated Groq API to generate contextual AI responses based on retrieved document content.
- Developed a responsive web interface using HTML, CSS, and JavaScript for document upload and intelligent document search.

Education

B.Tech in Computer Engineering

2025

Dr. Babasaheb Ambedkar Technological University, Lonere

Maharashtra, India | CGPA: 8.18/10

Additional

- Open to full-time opportunities in Python Development, Backend Development, and AI Development.
- Comfortable working with REST APIs, relational databases, Git-based workflows, and containerized applications.
